Energy Consumption

Solar energy is relatively new energy technology which is capable to reduce the energy consumption of the institute. On grid solar energy is the capacity of 100KVA is also installed to make use of renewable energy resource.

Practices:

Turn off the electrical appliances when not in use.

Use LED light bulbs

Use the fans only when they are needed

Keep lights off in conference rooms and lecture halls

Lead us through education

Landscaping with trees and plants

The number of trees and plants in the campus create an eco-friendly environment. Our college has a permanent gardener to look after the trees and plants. The trees in the campus will increase the overall health of students, reduce absenteeism due to hands-on activity-oriented learning.
